PROFESSIONAL SUMMARY

Entry-level Full-Stack Developer with hands-on experience designing, developing, and deploying scalable web applications using the MERN Stack, TypeScript, and RESTful API architecture. Proficient in building responsive frontend interfaces with React.js, developing backend services with Node.js and Express.js, and managing databases with MongoDB and MySQL. Experienced in implementing real-time features using Socket.io and integrating third-party payment APIs. Strong foundation in version control with Git, modular code architecture, and cloud deployment.

TECHNICAL SKILLS

Languages : JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend : React.js, Responsive Web Design, Component-Based Architecture, DOM Manipulation

Backend : Node.js, Express.js, RESTful API Development, MVC Architecture, Middleware

Databases : MongoDB, MySQL, Mongoose ODM, Sequelize ORM, Database Schema Design

Libraries & APIs : Socket.io, Razorpay, JSON Web Token (JWT), bcrypt, Axios

Tools & Methods : Git, GitHub, Postman, VS Code, Render, MongoDB Atlas, Code Review, Performance Optimization

EXPERIENCE

Full-Stack Developer

Jan 2024 – Present

Independent Project Development

Pudukottai, Tamil Nadu

- Independently designed, developed, and deployed **2 production-grade full-stack web applications** using MERN Stack and TypeScript, from concept to production
- Architected **MVC-based backend systems** with Node.js and Express.js, implementing modular code structure, middleware, error handling, and **10+ RESTful API endpoints** per project
- Managed source code using **Git and GitHub** with consistent commits, branch management, and continuous deployment via Render and MongoDB Atlas

PROJECTS

Real-Time Chat Application | [Live Demo](#)

React.js, Node.js, Socket.io, MongoDB, TypeScript

- Engineered a full-stack real-time messaging platform with **Socket.io** WebSocket integration, enabling instant bidirectional communication for **multiple concurrent users** with live online status tracking
- Implemented **3-layer security architecture** using JWT-based authentication, bcrypt password hashing, and protected API route middleware with Express.js
- Designed **optimized MongoDB Atlas schemas** for users, messages, and chat rooms, reducing query response time through indexing and efficient data modeling
- Developed **15+ reusable React.js components** with TypeScript, ensuring type safety, scalability, and a fully responsive user interface

E-Commerce Web Application | [Live Demo](#)

React.js, Node.js, MongoDB, Razorpay, TypeScript

- Developed a feature-rich full-stack e-commerce platform with product catalog, shopping cart, user authentication, order management, and **end-to-end checkout flow**
- Integrated **Razorpay payment gateway** for secure, real-time online payment processing, handling complete transaction lifecycle from initiation to confirmation
- Built and documented **12+ RESTful API endpoints** using Node.js and Express.js for product, user, and order management with proper validation and error handling
- Designed **normalized MongoDB schemas** using Mongoose ODM and a responsive React.js and TypeScript frontend with reusable component architecture

EDUCATION

Thandhai Periyar Government Arts and Science College

Trichy, Tamil Nadu

Bachelor of Arts – English Literature

Jun 2023 – Apr 2026

CERTIFICATIONS & TRAINING

Full-Stack Web Development – Self-directed training in MERN Stack, TypeScript, RESTful API design, real-time systems, and cloud deployment (2023–2024)

Key Areas: Responsive Web Design, Database Management, API Integration, Software Debugging, Performance Optimization
